

Does the correction in K2 change the masking steno?

I don't think so. I think this was an intentional mistake that he overlooked.

E S W J L L A E
T G

DQUMEBEDMHDAFMJGZNUPLG EWJLLAETG

Corrected line

DQUMEBEDMHDAFMJGZNUPLG ESWJLLAETG

This changes the table at 14 – Note ** I personally don't think this one is used ***

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28
-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	T	-	-	-	-	-	
J	-	-	-	-	R	-	-	X	-	-	-	-	G	A	-	-	-	R	-	I	-	I	-	-	-	-	-
V	-	E	-	A	R	I	E	D	F	-	E	P	T	I	-	E	-	C	-	I	B	R	-	R	O	P	R
I	F	C	G	N	H	T	R	I	K	Q	R	K	E	A	E	A	E	Y	B	R	E	-	-	K	J	Y	A

I think he deleted the character to keep the mask coding correct for the K4 mask control.

If this is a real mistake it changes the mask control to

MASK CONTROL in 4 bit nibbles . a

s a binary mask E= 1110 ; 3=0011; 7=0111 ; 1=0001 ; 0=0000

: E033337333137337313377131713

E	0	3	3	3	3	7	3	3	3	1	3	7	3	3	7	3	1	3	3	7	7	1	3	1	7	1	3
---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---

This would change the 3 to a 7. I think the 3 is correct as he tried to keep the mask correct and needed to delete a character to do this.

Note if you discard the “T” starting clue the table changes if you start with position 1 it starts with 7...

Since Jim is an artist not a crypto expert I go with him making the visual appearance correct. and the corrected mask control table is not used.
