

Data needed to solve K4.

I believe this is all the data needed to solve K4. The question is how to apply the mask to cipher “mask control”, and how is the mask word is used on the cipher.

The clues to this is in the words given with berlin clock. It’s a digital clock so this is a digital solution along with the morse section that misspelled iQlusion.

Now is the mask XOR, modulo 26, is the mask control binary, nibble, or hex.

Is it a shift count for two rings “L” and the normal A-Z.

K1 point to L

Between subtle shading and the absence of light lies the nuance of iqlusion.

Notice the misspelling ... “L”

This is also the letter that is out of line spatial encoded.

N GHIJLMNQUVWXYZKRYPTOSABCDEF GHIJL

This points to this alphabet as one of the keys to use for k4?

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z

Either the first or last letter is to be discarded, I think it’s the last letter, its just a pad.

This the mask control extract “-” = no character present ; character present = 1
extract starts at 23 “T” because T is your location.

1	2	3	4	5	6	7	8	9	1	1	1	1	1	1	1	1	1	1	2	2	2	2	2	2	2	2	2
