Begin by padding K4 CT into
7 columns and 14 rows

K 4
T H E
K R Y P T O S
P A L I M P S E S T

I have only used a sample of characters for this attempt. I am convinced by these findings that K4 contains two separate messages. When combined, the two messages are related to each other. This is not a full solution attempt, but only a proposed partial method of decipherment of K4.

- Nicholas C. LaMey 6.29.2016

1st set of plaintext: **COLN**
2nd set of plaintext: **BERLIN**

I believe K4 contains two separate sets of plaintext. The 2nd set of plaintext is written atop the 1st set.

The 1st set of plaintext combined with the 2nd set of plaintext reveal: LINCOLN
