

I have irrefutable evidence that Mengenlehreuhr is The Berlin Clock. I have developed and shown this evidence in my files. I would not have jumped in and stated this in my message, after Sanborn stated otherwise, unless I was certain about it. There are clues in K0 and K4 relating to this: In K0, DIGITAL INTERPRETATION and in K4: As you pad K4+Z into seven columns, you see DIGE UHR (digital clock) in distinct clusters in the bottom two rows. (I have already shown that the first action taken on K4 is to add a Z to the front, so a full 7-column matrix is displayed.) Notice that the E in DIGE is the same E as in BERLINCLOCK per Sanborn's clue! Notice also that three of the Ks in column 5 correspond to Ks as shown in the keyword THEBERLINCLOCK and are clues to that effect. (The other K is part of KLU which indicates a clue regarding DIAWINFBN.) This keyword is used in solving K4.

Z	O	B	K	R	U	O
X	O	G	H	U	L	B
S	O	L	I	F	B	B
W	F	L	R	V	Q	Q
P	R	N	G	K	S	S
O	T	W	T	Q	S	J
Q	S	S	E	K	Z	Z
W	A	T	J	K	L	U
D	I	A	W	I	N	F
B	N	Y	P	V	T	T
M	Z	F	P	K	W	G
D	K	Z	X	T	J	C
D	I	G	K	U	H	U
A	U	E	K	C	A	R

The Z added to the front of K4 was derived via analysis of K2 and K3 plaintexts along with analysis of the shifts of ABSCISSA keyword used on the DOORWAY text of K2 ciphertext, which is the last 120 characters of K2 ciphertext as arranged in a 12 by 10 matrix (paying particular attention to rows 9 and 10 and especially what letters appear in the 9th position from the end of row 10 of the matrices). Notice that appending the Z to the front of K4 is implied by Kryptos. It is the first step in solving K4!

Layout of Keyword THEBERLINCLOCK:

C	L	O	C	K	T	H
E	B	E	R	L	I	N
C	L	O	C	K	T	H
E	B	E	R	L	I	N
C	L	O	C	K	T	H
E	B	E	R	L	I	N
C	L	O	C	K	T	H
E	B	E	R	L	I	N
C	L	O	C	K	T	H
E	B	E	R	L	I	N
C	L	O	C	K	T	H
E	B	E	R	L	I	N
C	L	O	C	K	T	H
E	B	E	R	L	I	N
C	L	O	C	K	T	H
E	B	E	R	L	I	N

Analysis of K4 following the Sanborn release of the BERLINCLOCK clues quickly shows that BERLINCLOCK is part of a 14-character keyword. The keyword is THEBERLINCLOCK. Take notice that this keyword is not used until several steps have been taken into K4.

Another word used in solving K4 is MENGENLEHREUHR. The keyword is lined up to have letters ENGEN correspond to QSJQS that appear in K4+Z in rows 6 and 7 as they have the same structure XYZXY. (Yes, it took me a while to figure that out.)

E	N	L	E	H	R	E
U	H	R	M	E	N	G
E	N	L	E	H	R	E
U	H	R	M	E	N	G
E	N	L	E	H	R	E
U	H	R	M	E	N	G
E	N	L	E	H	R	E
U	H	R	M	E	N	G
E	N	L	E	H	R	E
U	H	R	M	E	N	G
E	N	L	E	H	R	E
U	H	R	M	E	N	G
E	N	L	E	H	R	E
U	H	R	M	E	N	G

One would have to view my file SIDE-BY-SIDE to see where these keywords are used.

So, it's irrefutable that Mengenlehreuhr is THEBERLINCLOCK.
