IDBYROWS to LAYERTWO, A Descriptive Visual Account

In this, I show how instructions were provided in KRYPTOS for finding LAYERTWO. I believe I will show, beyond any doubt, that the character S was purposely "removed" from the ninth position from the end of K2 to hide LAYERTWO. In other words, to make solving for LAYERTWO a necessary part of solving KRYPTOS. The "removal" of the S from the K2 CT was by no means a mistake.

Ever since the publication of the solutions to the first three parts of KRYPTOS, the meaning of the last 8 characters of the K2 PT, IDBYROWS, have only been guessed at. Recently, other work being done that concentrates on 12-column pads, particularly the work showing a possible correspondence between LAYERTWO, its CT equivalent and other parts of the K2 CT, have caused me to take a closer look at what might be revealed beyond that. In studying the original K2 CT, I decided to check to see if there was a row in the pad that begins with the letter S, as directed by the curious IDBYROWS. I saw that the 12-column pad had only one row that begins with the letter S! The complete row, S Y Q P F E U N L A V I, decrypts to K N O W S T H E E X A C. One can read this as saying, "NO S THE X".

The first two rows of the lower panel of the KRYPTOS CT are:

E N D **Y A H R** O H N L S R H E O C P T E O I B I D Y S H N A I A
C H T N R E Y U L D S L L S L L N O H S N O S M R W X M N E

In a cluster towards the right side are the characters

B I D Y S
N O S M R W X

The characters in this cluster compare closely with IDBYROWS. But also the characters NOS and X are there also. Note, it is no coincidence that the X is directly below the S.

So now there seem to be two places, one in the PT and one in the CT that talk about NO S and X.

"NO S THE X"

But, K3 describes what must happen. This is the sole purpose of K3 - to say that the reason the X is missing from the end of K2 is that the S has been removed and that when replacing the S, the X will reappear and reveal hidden information. My interpretation of the K3 text:

K3 PT

SLOWLY DESPARATLY SLOWLY THERE MAIN S OF PASSAGE DEBRIS
THAT ENCUMBERED THE LOWER PART OF THE DOORWAY WAS REMOVED
WITH TREMBLING HANDS I MADE A TINY BREACH IN THE UPPER LEFT HAND
CORNER AND THEN WIDENING THE HOLE A LITTLE I INSERTED THE CANDLE
AND PEERED IN THE HOT AIR ESCAPING FROM THE CHAMBER CAUSED THE
FLAME TO FLICKER BUT PRESENTLY DETAILS OF THE ROOM WITHIN EMERGED
FROM THE MIST X CAN YOU SEE ANYTHING Q

K3 deals solely with talking about the removal of the S from the ninth position from the end of the K2 CT and with replacing it to reveal XLAYERTWO. "S WAS REMOVED FROM THE DEBRIS TEXT THAT EXISTED IN FRONT OF THE LAST SECTION (K4). I INSERTED THE S IN THE PLACE ON THE LEFT SIDE, CAUSING THE MISSING X TO APPEAR AND REVEALING HIDDEN INFORMATION." Note, Sanborn described LAYERTWO as being some more text between ...WESTX of K3 and the following section (K4). Hence it is DEBRIS since it is not part of either K3 or K4.

So IDBYROWS does instruct to identify something by looking at row S. Row S decripts to indicate that X is missing because there is no S. K3 directs to insert an S to make X appear and reveal something.
