

DEKRYPTOS

K4R2A

DRAFT

By: Joshua.tully@gmail.com

Method: Steganography / Riddles

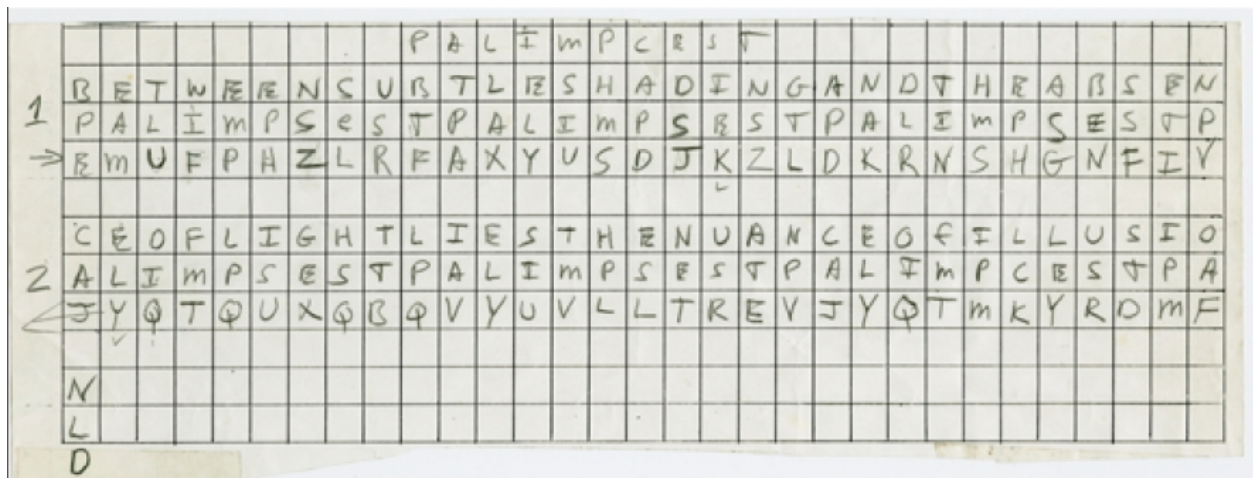

Carrier Text: Using K1 (PT and CT)

Storyline: When Howard Carter breached the entrance to Tut's tomb 'Wonderful Things moment.'

Hint: The start of K1 cipher text is EMUF; backwards its FUME.

Markings:

	The first e in keyword PALIMP Se ST is lowercase. Possibly signaling that SUBTLE(PT) is important or draw attention to the L in CT directly below.
	Row labeled 2, arrow seems to indicate direction of decoding, the below method only uses this direction.
	May represents flames of the candles
Rule of 4	Patterns of 4 are sprinkled through the Kryptos sculpture.

STEGO TYPE - 1

- Locate your starting position (**A**) within the mask layer.
- Find the next instance of the K4 character (**B**).
- The decoded letter (**C**) is that position, but in the (PT)

STEGO TYPE - 2

- Locate your starting position (**A**) within the mask layer.
- Move over by K4 alphabet value (**B**)
- The position you land on is your decoded character (**C**)

Story wise I believe the Qs represent candle flames that are blown out, likewise the first 4 letters of the cipher text is EMUF, or FUME read backwards.

NOTE! It's important to record the K4 Plain Text as you decode for the masking layer will shift around.

Legend:

- FIRST M / C** (indicated by a blue arrow pointing to the 'T' in the bottom row)
- SECOND T / N**

Step 4: Delete the two CT Ls above red text “**LIES**”

DELETE THE L

DELETE THE L

STEP 5: Continue with STEGO type-1 method to complete this block revealing VT = LI.

THIRD T / I

FOURTH V / L

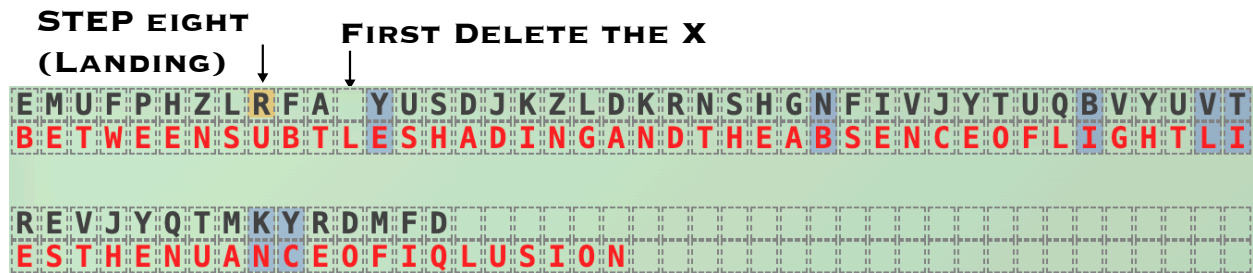

STEP 6: Continue with the STEGO type-1 for YNB but read backwards so that you are decoding B,N, and Y

SEVENTH Y / E

SIXTH N / B

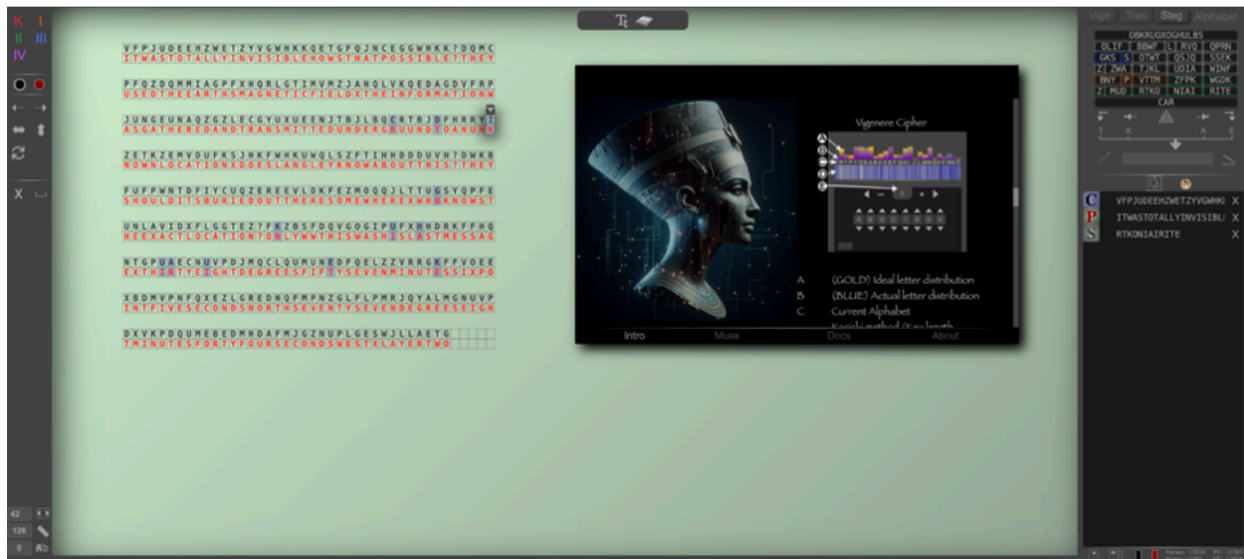

FIFTH B / I

STEP 7: Delete the X at index 12 of your masking layer, this will be your new position due to the shifting of text.

STEP 8: Perform a type-2 STEGO method to land on R which is P distance away.

If you are using DeKryptos.com you can use the following:

STEP 1: Load the K1 chart by clicking  in the top-left of the tool bar.

STEP 2: Press the STEG button in the top-right to load your STEGO tool.

STEP 3: Select the Cipher Text (BLACK) Layer.

STEP 4: Load **VTTM** from the STEG Field by clicking on the block shown below.

STEP 5: Press the reverse button in the STEG tool.

STEP 6: On the chart, Delete the 4 Q's marks above the words **ABSENCE OF LIGHT** by clicking the on the Qs and pressing delete button, in the toolbar.

STEP 7: Click on your insertion point in the misspelled word illusion.

STEP 8: Press the STEGO type-1 button twice to recover CN.

STEP 9: Delete the two L s in the cipher text above the word **LIES**

STEP 10: Press the STEGO type-1 button twice to recover IL.

STEP 11: Press **reverse** in the STEG tool to orient the decoded block

STEP 12: Click the scribe icon to apply.

STEP 13: Load your next block by clicking on the BNY field.
