

Kryptos ties to Nefertiti?

Jamie Bonsall 1/4/2022

The screenshot shows the Kryptos Solver application. The main grid displays a 31x39 grid of letters. The top row is mostly zeros, with some numbers indicating column positions. The grid contains various colored letters: yellow (e.g., 'D', 'Y', 'A', 'H', 'R'), magenta (e.g., 'Q', 'U', 'E', 'E', 'N'), blue (e.g., 'T', 'I'), and green (e.g., 'F', 'E', 'R'). The right side of the application has several control panels:

- Show Plaintext:** Includes checkboxes for c1, c2, c3, c4, an 'Invert All (F5)' button, and a 'Set only*' checkbox.
- Highlight Letters:** Includes color selection boxes for Red, Green, and Blue, and checkboxes for 'Follow CT/PT*', 'Follow shifting*', and 'Match selection*'. There are 'Highlight' and 'Reset' buttons.
- Mark Cells:** Includes checkboxes for 'iQlusion', 'grUund', and 'dYAhR', a color selection box, and buttons for 'Mark (F6)', 'Clear (F7)', 'Mark All*', and 'Clear All'.
- Shift Letters:** Includes 'Caesar (normal alphabet)' and 'KRYPTOS Alphabet' sections with shift value inputs (0-25) and buttons for 'Set'.
- Keys:** Includes input fields for 'k1' (PALIMPSEST) and 'k2' (ABSCISSA) with 'Set' buttons.
- Line Endings:** Includes buttons for 'Symmetric', 'K2 Calendar', and a 'Set All' button with a value of 30.
- Layout:** Includes input fields for 'Rows' (31), 'Cols' (39), and buttons for 'Fit' and 'Font'.
- Reset:** Includes buttons for 'Formatting', 'Keys and Text', and 'Line Endings'.
