

Billboard in Moscow

Paul Kiesel, 8/17/2018

When Scheidt made the comment about recognizing a clue on viewing a billboard in Moscow, the appearance of J. Edgar Hoover's name along the right edge and corners of the CT caused me to think this might be the billboard to examine. In looking at the pattern of the appearance of the letters of Hoover's name in the corners, I, like others, was puzzled by the appearance of the V and E, which are letters in Hoover's last name in the left corners of the bottom CT panel. It was observed by members that these letters were part of Hoover's last name, but a connection was not made as to how they might apply to a possible scheme. After looking at this for a while I noticed that the E and R of Hoover's last name might (by plan) show up in one or the other of two places as noted in the diagram below. One place was at the beginning and end of ENDYAHR. The other place was at the beginning of the row where K3 ends and K4 begins, the E being the first letter and the R being the last in the row. To me, it was pretty obvious that Hoover's whole name was involved here and I needed to find a way for the HOO part to become apparent. I noticed that there was a TT following the V on the corner. Maybe this would be more than a coincidence, so I did a Caesar shift of 21 and discovered that the M after the TT decrypted to H, as well. I had succeeded in getting Hoover's whole name with some small amount of manipulation. To me, it was clear that I needed to find a way to complete Hoover's name. The go-ahead nudge was right there in full view.

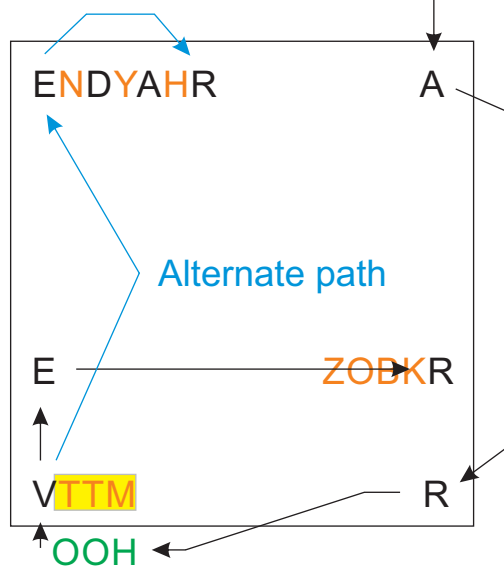

JEDGAR Revisited

I arrived at this on
9/29/2017

Notice that the sequence of
letters in Hoover's name is
in the shape of a big S!

**This is the second step
in going through the K4
doorway. Step 1 had us
add a letter to K4 matrix.
Step two is the first
manipulation step after
stepping through the
doorway.**

Note doublet
and Caesar shift
of 21 between
OOH and TTM.

B E T W E E N
S U B T L E S
H A D I N G A
N D T H E A B
S E N C E O F
L I G H T L I
E S T H E N U
A N C E O F I
Q L U S I O N

HOO part of J. Edgar Hoover's
name is missing!

A 21 Caesar Shift of TTM
will get you OOH.

Hi Paul,

the plain text in K2 will have to be written out in columns of eight. I'm not sure if I'm describing it correctly. It should look like this

I T W A S T O T
A L L Y I N V I

....
F O R T Y F O U
R S E C O N D S
W E S T X L A Y
E R T W O

it will match with K4's when K4 is rotated in this fashion.

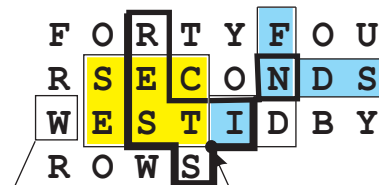

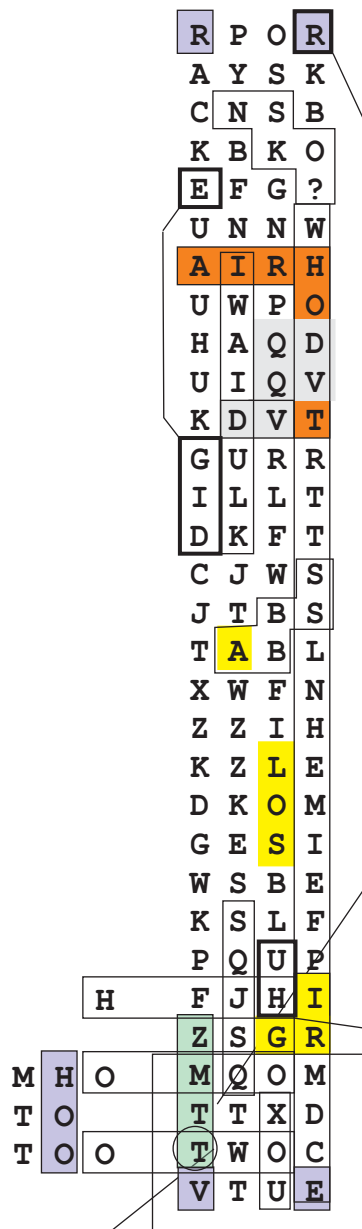

M Q O
T T X
T W O
V T U

Emphasis mine.
P.K.

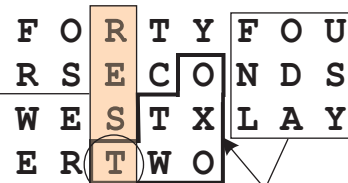

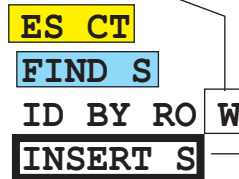

And next page....

K4 CT

K2 PT (8-Column Pad)

Before S
Insertion

After S
Insertion

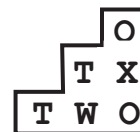

FOUND S LAY

Note:

LAY = POSITION

re: (...WES)T IS YOUR
POSITION)

So, placing the S in the K2 CT
in the 9th position from the end
causes the above match:

between the K2 PT and the K4
CT. The result of this is that the
word REST now appears
vertically with the T at the
bottom. This is a clue to look at
the letters in K4 that lie above
the T.

And next page....

				R	P	O	R	
				A	Y	S	K	
				C	N	S	B	
				K	B	K	O	
				E	F	G	Z	
				U	N	N	W	
				A	I	R	H	
				U	W	P	O	
				H	A	Q	D	
				U	I	Q	V	
				K	D	V	T	
				G	U	R	R	
				I	L	L	T	
				D	K	F	T	
				C	J	W	S	
				J	T	B	S	
				T	A	B	L	
				X	W	F	N	
				Z	Z	I	H	
				K	Z	L	E	
				D	K	O	M	
				G	E	S	I

W	S	B	E	K	S	L	F
P	Q	U	P	F	J	H	I
Z	S	G	R	M	Q	O	M
T	T	X	D	T	W	O	C
V	T	U	E				

Notice association
with TWO.

P.s., Do the shift on the whole
K4 matrix.

Some observations: Isn't it cool that something that hasn't been subject to a Caesar Shift has a value of 26? Remember now that Kryptos CT has increased in number of characters. This is not a minor thing. Think about the possible resulting outcomes.

One last thing. Remember what I said in the first list about what the clue signs are. You might take a look at K4 CT before you start to manipulate things.

It's all up to you now. I'm retreating into the shadows so as not to be found (unless you have managed to eke out that last minuscule bit. If you have, please contact me.)

Good Luck!

Paulk
