

K4 unveiled (or not 😊)

niorflan@gmail.com

Previous keys:

PALIMPSEST

ABSCISSA

New key is provided by the abscissas of the word palimpsest written in the first row.

$I \rightarrow P$

$M \rightarrow S$

$P \rightarrow D$

$S \rightarrow G$

$E \rightarrow L$

$S \rightarrow G$

$T \rightarrow E$

New key is : DHRPSDGLGE

We apply this new key to the beginning of K4:

CT	O	B	K	R	U	O	X	O	G	H
KEY	D	H	R	P	S	D	G	L	G	E
PT	C	B	J	M	D	C	S	U	H	K

The result is not very convincing. But we know that a second step could be required, as all the traditional methods failed. Let's make the assumption this second step is very easy. Easiest coding system is Ceasar's code.

C	B	J	M	D	C	S	U	H	K
---	---	---	---	---	---	---	---	---	---

C	B	J	M	D	C	S	U	H	K
D	C	K	N	E	D	T	V	I	L
E	D	L	O	F	E	U	W	J	M
F	E	M	P	G	F	V	X	K	N
G	F	N	Q	H	G	W	Y	L	O
H	G	O	R	I	H	X	Z	M	P

X	W	E	H	Y	X	N	P	C	F
Y	X	F	I	Z	Y	O	Q	D	G
Z	Y	G	J	A	Z	P	R	E	H
A	Z	H	K	B	A	Q	S	F	I
B	A	I	L	C	B	R	T	G	J

- We can have a look at the last row:

B A I L C B R T G J

- BAIL is related to *Security*. The rest of the line does not make any sense, except that it starts by CB, like the first line:

C B J M D C S U H K

- I take this as a hint to tell us we have to start again from this point and find a new key.
- This means we finally only use the key DHRP on the letters OBKR, which gives us CBJM and therefore BAIL through the Ceasar.

- Using different short keys (typically 4 to 5 characters long) is known as One Time Pad, and this is considered as the safest coding system. Usually we require sheets full of pads. But what about a system where the keys would be generated by yourself, as you progress in the code?
- What could be the next key? We just used a Ceasar code, I tried immediately the word CESAR (that's Ceasar in French...it was not on purpose, I did not think about the different spelling between English and French...)

We get now
two words and
a letter:

BAIL, SAFE
and V

On line 4, we
can also notice
a funny group
of letters:

EDLOVDIHY

DIHY leads us
to dihydrogen,
H2.

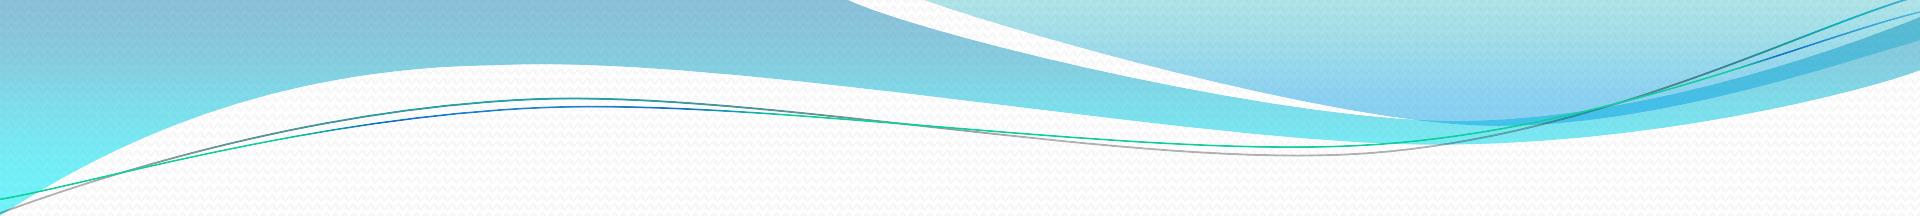

ED LOV H2

- ED LOV DIHY could be an artefact.
- But, it could also be a hint. Ed could be a reference to Ed Scheidt, and H2 could be a confirmation, as the second letter of the key line is H. BAIL and SAFE lead us to *security*. Seek your IT...Ed?
- What could be the next key? I tried SECURITY of course, but nothing. I tried again CESAR.

Elder people will
remember Mr Zip.

- 
- We have BAIL, SAFE and maybe a reference to ED. All this lead us to the security concept, and of course to the CIA.
 - Mr ZIP tells us what to do : use ZIP code, the last word in mail adress.
 - V is the last item we had, following BAIL and SAFE. Langley is located in VIRGINIA, this is our new key!

We don't find any new word or clue. If we go back to the hint we had, ED LOV H2, we can notice that two H are in position 2 (one from the bottom end, in row 2, and one from the top, in row 4). If we keep other rows unchanged we can slide vertically rows 2 and 4 in order to align these 2 H and try to find something...

We already went through 33 rows. At the end it looks quite rational.

Two Ceasars of -1, a direct vigenere, and three Ceasars of +4.

The Keys are : DHRP, CESAR (*2), VIRGINIA, PERFECT and DIAL

The words are : BAIL, SAFE-V, MRZIP, NOBODY'S P, FAIS TEL and TIDY

A clue was ED LOV DIHY / H2

If you except the fact that all this does not make any sense, you might agree this could be the breakthrough in K4. So, what's next?

KEY	D	I	A	L

We put everything in order. We have 33 rows. Last key was DIAL, we could DIAL a phone number. + 33 is the phone code to call to France, and we have been using French a couple of time...

Let's call France and take THIRTY THREE for the next key. Or, to avoid wasting time, we can cut it at THIRT, the rest is useless.

On the second line ZWEI gives us « I LIT », which could be related to the sun / H2. DREI makes appear SWITZ on the first line. SWITZERLAND is one of the few German speaking countries in the world. This country is quite famous for its banks and safes...

ZWEI mal DREI = SECHS (2*3=6)

CT is SEKZ just there...which is also the short for seconds in German.

I have tried some keys related to light and German, but nothing worked. Then, I tried to find something famous in Switzerland (other than bank). They have cheese, chocolate, and CLOCK...

We can first notice that the encrypted text is DIA (Day in latin) and WIN. SEKS was a hint hidden in the Encrypted Text, I believe we have another hint hidden there. On the line of I LOV YU F we get T and MUMY. Mummy is a reference to Egypt but also to the woman we love. T leads us to the line starting with a T : THA I AM. Next key is THA.

We get a confirmation through the MUM (this is mandatory, as a 3 letters key is not very robust and credible...). SAS has many meanings, related to the special forces or to special keys combination on computer. MUM and SAS are 5 lines away, if we go 5 lines upper we find GO G.

If we add G to the key THA, we get THAG, which sounds the same in German as TAG, the day (we just had DIA). If we start a new day, we need to be polite. GUTEN TAG in German. Let's try GUTEN

We can see **BERLIZ** appears.
 Berlitz is a famous company and
 method to learn foreign language.
 We can modify the key to get
BERLIN.

Berlin was the most famous city of
 Germany, which is a good
 achievement with all these
 German references. But a few
 cities in the US are also named
 Berlin. If we keep going with the
 GO G hint, we may have a look of
 what Berlin in **GEORGIA** gives as
 a new key...

The word **CLOCK** appears. We find also a GPS GO quite interesting. Berlin, in Georgia, has the following GPS coordinates:

N 31° 4' 3" W 83° 37' 25"

We can transform this in letters, by applying a modulo 26 and replacing the numbers by the associate letters in the alphabet.

For example, 31 gives 5 and then E. We get the following key :

N E D C W E K Y

KEY	N	E	D	C	W	E	K	Y

We find again a GPS (on the same line than the GPS already found). We have been able to transform GPS coordinates in letters, we can do the reverse. We make the assumption we are in the North and West quadrant.

T=20, E=5, D=4, B=2, K=11 , Y=25

We have been using modulo before, we can also assume there might be some hidden modulo. Let's make the assumption it's in America, and add +26 to the latitude and +78 to the longitude.
GPS : N 46°5'4" W 80°11'25"

We land in the *French River*, in Canada. After all this French, why not.

We arrive at the end of K4, with almost twenty different keys that have been used as one time pads. We have found the same amount of words, and all this does not make a lot of sense.

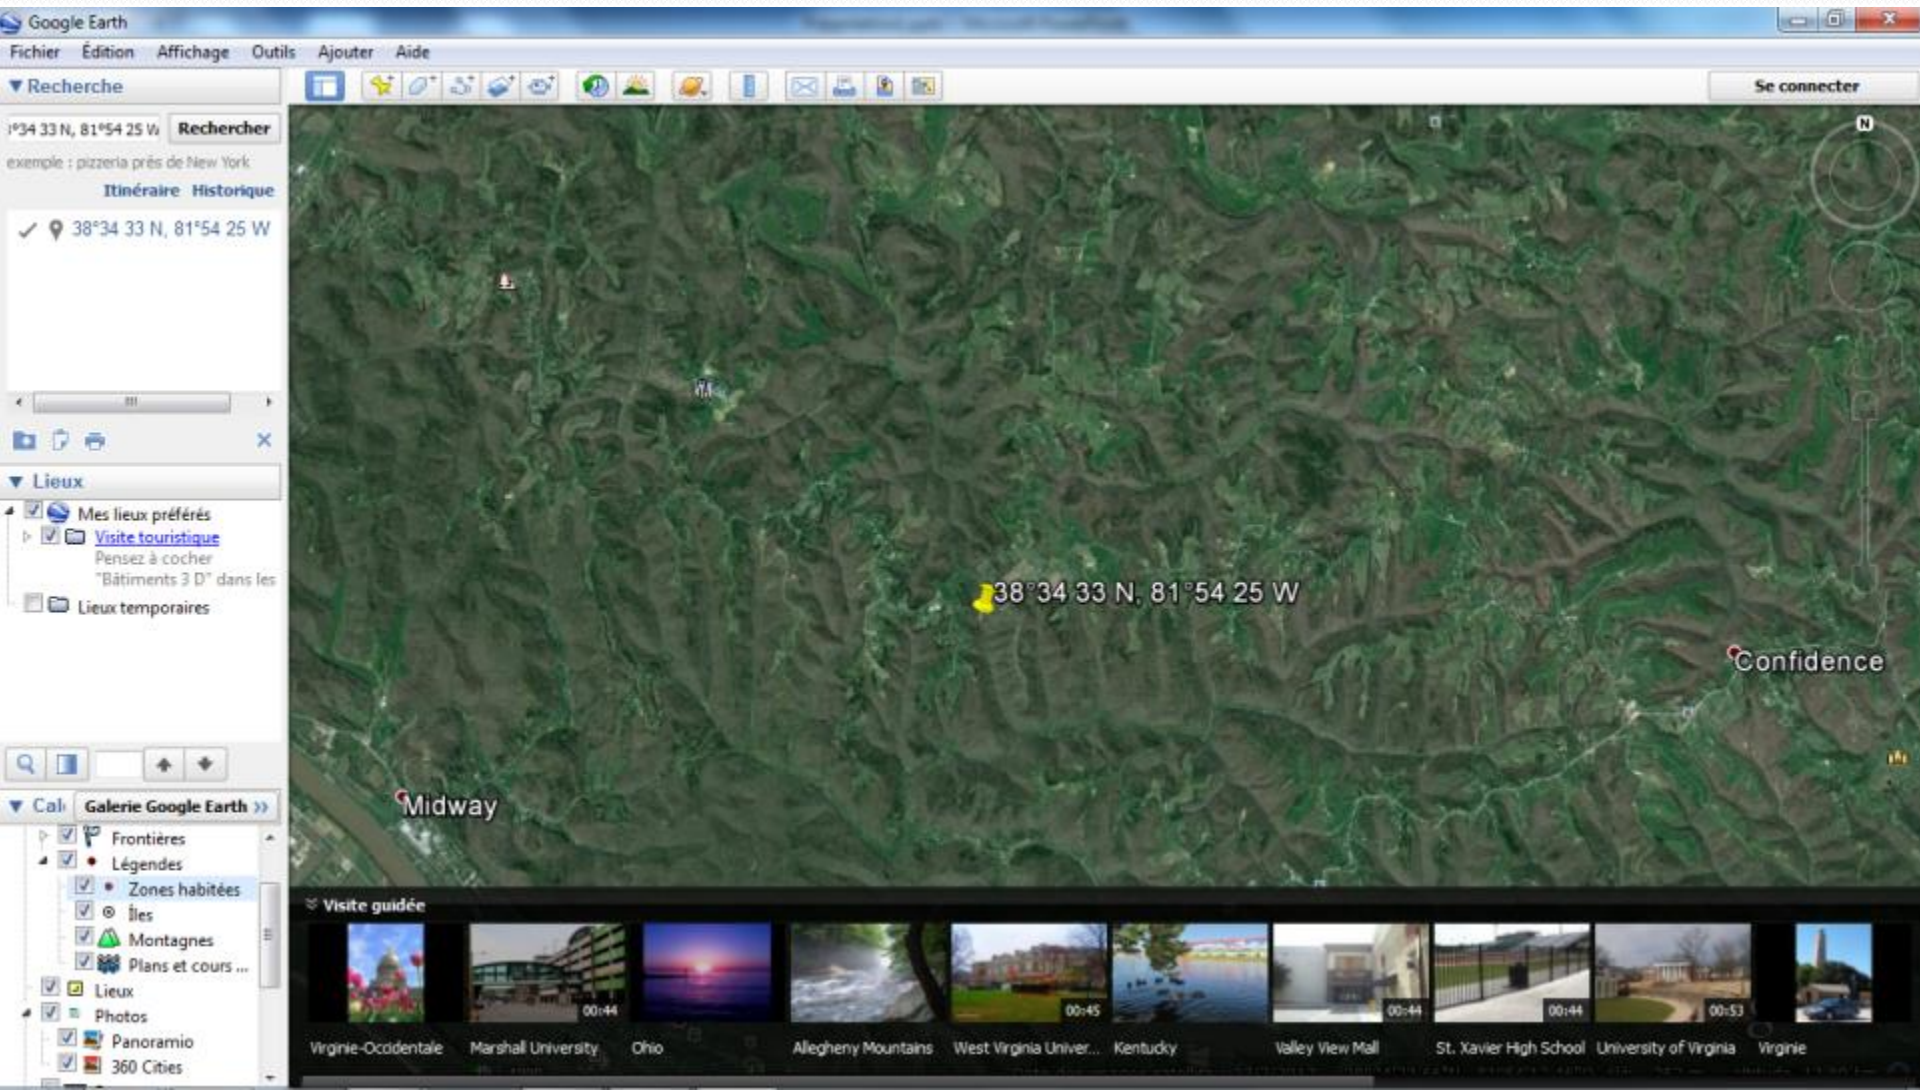

We have also three set of GPS coordinates : one from previous part of Kryptos, and two new sets from K4. These three sets are:

Berlin GA	N	31	4	3	W	83	37	25
French riv	N	46	5	4	W	80	11	25
Langley	N	38	57	6,5	W	77	8	44

We can first have a look to what lies between Berlin GA and the French river.

The midway point is located at: N 38° 34' 33" W 81° 54' 25"

We land in West Virginia, between two towns called Midway and Confidence... so, let's be confident and keep going.

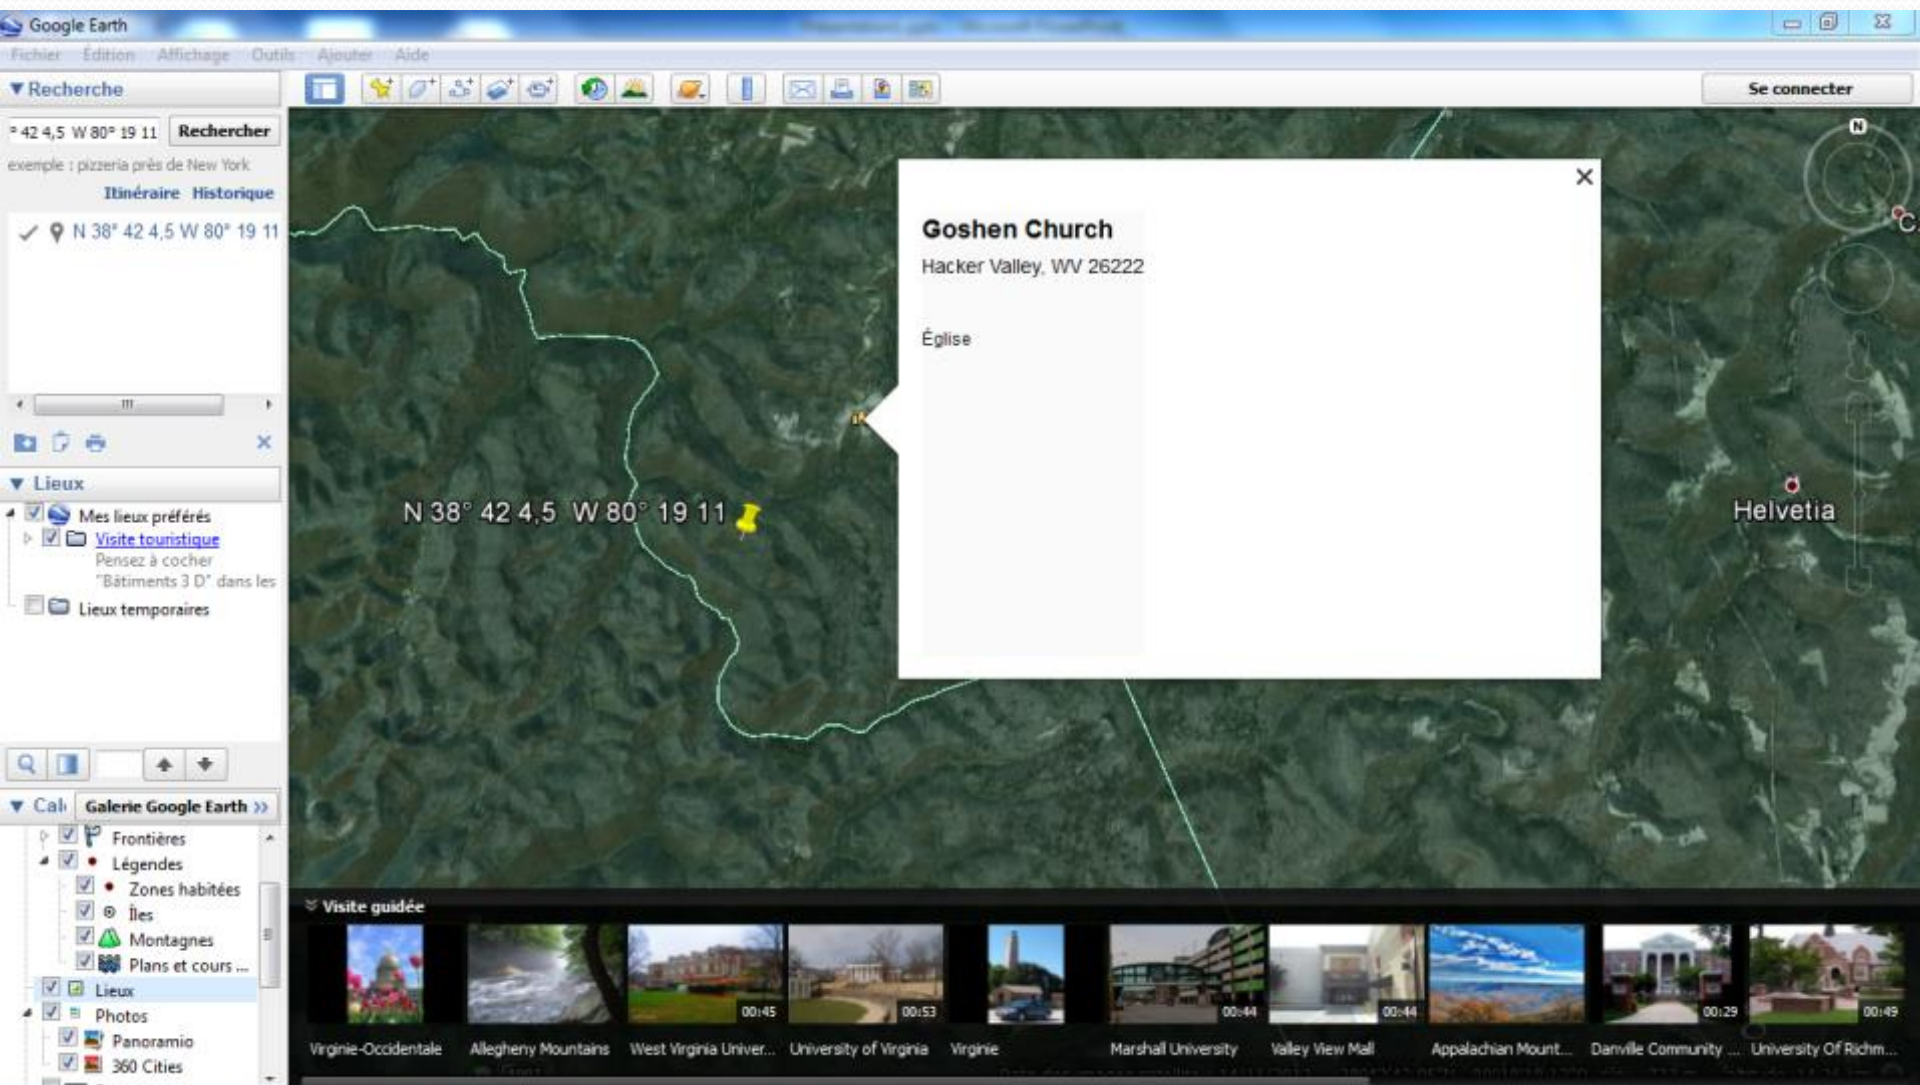

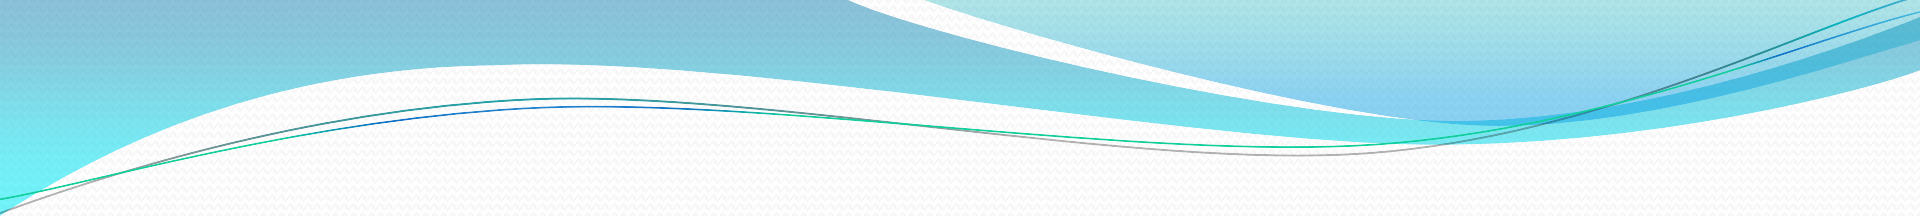

Let's have a look where is the center of these three locations:

Berlin GA	N	31	4	3	W	83	37	25
French riv	N	46	5	4	W	80	11	25
Langley	N	38	57	6,5	W	77	8	44

The center of gravity is located at: N 38° 42' 4,5" W 80° 19' 11"

We land close to a church in Hacker Valley, next to Helvetia.

We land close to a church, called Goshen Church. Goshen was the name of the land given by the Egyptians to the Jews in the ancient time.

This church is in a town called HACKER Valley, which is next to the city HELVETIA. Helvetia is the old name of Switzerland. This town as been created by some migrants who wanted to preserve their souvenir of Home.

French + German are the languages talked in Switzerland, and they were parts of the decryption process.

The odds to land with GPS coordinates in a place between HACKER and HELVETIA were very small. I would assume this is a way to confirm to us we have achieved what was the plan. But for sure this is not the end...

Any feedback are welcome, to tell me how good/crazy I am.
