

# Kryptos K4 Code – A possible deciphering method

Olivier ROLIN, July 2024

## I. Introduction

The objective of this paper is not to propose a complete or definitive solution to the famous KRYPTOS K4 code, but simply to share some thoughts and encourage debate to continue the search for the solution.

It simply suggests exploring a possible ciphering method, which:

- Can explain the clues revealed by the creators of the KRYPTOS sculpture (words “EAST NORTHEAST” and “BERLIN CLOCK”).
- Give a possible explanation for the anomaly in the  $D^Y A H^R$  sequence present in the upper left corner of the second panel of the sculpture.
- Propose a solution for the beginning of the K4 code and some possible results for decrypting the rest of the message.

The proposed method is quite simple, based on the successive application of two Vigenère codes. The key used for the first one (1<sup>st</sup> layer of coding) would be a sentence taken from American literature. The second one (2<sup>nd</sup> layer of coding) would use a mathematical sequence of letters as the coding key.

If this method is the one actually used, the difficulty remains the full discovery of the second key, which refers to geometric sequences of letters and which should likely be hidden in the rest of the sculpture according to a method which remains to be discovered. The  $D^Y A H^R$  sequence probably plays a role in the definition of this mathematical stream of letters.

## II. Main available information regarding the K4 code

Without claiming to be exhaustive, statements taken for granted for the K4 code can be summarized as follows:

- The K4 code has 97 characters, which is very few to allow statistical processing to find the encryption method.
- The encryption process includes at least two successive encoding layers.
- According to the creators of the sculpture, a masking technique was used to make the application of decryption methods more complex and prevent “brute force” approaches.
- The upper left corner of the second panel of the sculpture features some offset letters ( $D^Y A H^R$  anomaly) which are believed to play a role in the encryption method used for the K4 code.
- It seems that the K4 code is not the final step of the solving process and that there could be a hidden K5 code, the resolution of which could not take place without having previously solved the K4 code.
- Several elements of the solution were revealed by the creators of the sculpture: “EAST NORTHEAST” (position 21-33) and “BERLIN CLOCK” (position 63-73).

## III. Possible encryption method used for the K4 code

### a) Encryption method principles

The encryption method used for the K4 code could be based on the successive application of two layers of Vigenère code.

The keys corresponding to each of these codes were defined using the two available clues provided by the creators of the sculpture : “FLRVQQPRNGKSS” means “EASTNORTHEAST” (position 21-33) and “VTMZFPK” means “BERLINCLOCK” (position 63-74).

### First encryption layer

The first layer would be Vigenère code based on a sentence from an American book “*Two hundred miles on the Delaware River*” published in 1867 by Hoff, J. Wallace (<https://www.loc.gov/item/01021510/>).

The specific sentence used would be : “[... ] *clear cut against the dark blue sky, Luna's upper edge appeared, forming an enchanting background for the display of the feathery limbs and leafy tree tops on the brow of the rocky eminence.*” (the first word “Then” is eluded).

Why this sentence?

I have not been able to determine whether this book, its subject matter, or its author have any particular connection to Langley or the creators of Kryptos.

But, it can be noted that:

- This sentence could be a very suitable answer to the question concluding the K3 code: “*Can you see anything?*”;
- This sentence was discovered based on available clues located in the middle of the code; however, it fits perfectly the start of the K4 code, by removing the first word “*Then*” from the full sentence.

All of this data can be summarized as follows:

| CODE K4 |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |
|---------|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
|         |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   | O | B | K | R |
| U       | O | X | O | G | H | U | L | B | S | O | L | I | F | B | B | W | F | L | R | V | Q | Q | P | R | N | G | K | S | S | O |   |   |
| T       | W | T | Q | S | J | Q | S | S | E | K | Z | Z | W | A | T | J | K | L | U | D | I | A | W | I | N | F | B | N | Y | P |   |   |
| V       | T | T | M | Z | F | P | K | W | G | D | K | Z | X | T | J | C | D | I | G | K | U | H | U | A | U | E | K | C | A | R |   |   |

| 1st LAYER - VIGENERE KEY |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |
|--------------------------|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
|                          |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   | C | L | E | A |
| R                        | C | U | T | A | G | A | I | N | S | T | T | H | E | D | A | R | K | B | L | U | E | S | K | Y | L | U | N | A | S | U |   |   |
| P                        | P | E | R | E | D | G | E | A | P | P | E | A | R | E | D | F | O | R | M | I | N | G | A | N | E | N | C | H | A | N |   |   |
| T                        | I | N | G | B | A | C | K | G | R | O | U | N | D | F | O | R | T | H | E | D | I | S | P | L | A | Y | O | F | T | H |   |   |

### Second encryption layer

The second layer would be a Vigenère using a key based on geometric sequences of letters, according to the Kryptos alphabet. These sequences are defined by:

- A first letter, corresponding to the starting letter of the sequence.
- A second letter, corresponding to the constant shift interval between two consecutive letters of the sequence.

For example, the sequence associated with the letters D and Y is as follows:  $D \xrightarrow{+Y} F \xrightarrow{+Y} H \xrightarrow{+Y} J \xrightarrow{+Y} M \dots$ , which gives the sequence DFHJM...

By convention, we can note this sequence  $D^Y$ : as we will see next, I think that these sequences are linked to the  $D^{Y^A}H^R$  anomaly located at the upper left corner of the second panel of the sculpture.

Finally, it should be noted that these sequences of letters are quite comparable to the operating principles of the famous Berlin Clock or Mengenlehreuhr, which appears in the solution given by Jim Sanborn and whose principles were widely thought to have inspired the coding method.

## b) Application of this method to available clues

The application of these principles leads to the following results:

|               |                |                |    |    |    |    |    |    |                |    |    |    |    |  |    |                |                |    |                |    |                |    |    |    |    |
|---------------|----------------|----------------|----|----|----|----|----|----|----------------|----|----|----|----|--|----|----------------|----------------|----|----------------|----|----------------|----|----|----|----|
|               | 21             | 22             | 23 | 24 | 25 | 26 | 27 | 28 | 29             | 30 | 31 | 32 | 33 |  | 63 | 64             | 65             | 66 | 67             | 68 | 69             | 70 | 71 | 72 | 73 |
| CODE K4       | F              | L              | R  | V  | Q  | Q  | P  | R  | N              | G  | K  | S  | S  |  | N  | Y              | P              | V  | T              | T  | M              | Z  | F  | P  | K  |
| 1st LAYER KEY | K              | B              | L  | U  | E  | S  | K  | Y  | L              | U  | N  | A  | S  |  | H  | A              | T              | N  | I              | N  | G              | B  | A  | C  | K  |
| 2nd LAYER KEY | R              | Y              | T  | W  | J  | C  | Y  | U  | H              | A  | K  | N  | V  |  | W  | D              | X              | F  | K              | M  | V              | K  | K  | K  | K  |
|               | ? <sup>R</sup> | T <sup>N</sup> |    |    |    |    |    |    | V <sup>?</sup> |    |    |    |    |  |    | ? <sup>?</sup> | D <sup>H</sup> |    | M <sup>T</sup> |    | K <sup>K</sup> |    |    |    |    |
| SOLUTION      | E              | A              | S  | T  | N  | O  | R  | T  | H              | E  | A  | S  | T  |  | B  | E              | R              | L  | I              | N  | C              | L  | O  | Q  | K  |

### First Clue “EAST NORTHEAST” (Position 21-33)

- The T<sup>N</sup> sequence makes it possible to explain 10 of the 13 letters of this clue, which constitutes, in my opinion, a very good result (or at least a rather promising result).
- The sequences located at both ends of the clue (?<sup>R</sup> and V<sup>?</sup>) cannot be, at this stage, completely determined: for the sequence ?<sup>R</sup>, we do not know where its start is located in the code and so the first letter used. For the sequence V<sup>?</sup>, it is impossible to determine the shift used from a single letter.

### Second Clue “BERLIN CLOCK” (Position 63-73)

- The sequences are shorter than for the first clue, between 3 and 4 characters: D<sup>H</sup> (4 characters), M<sup>T</sup> (3 or 4 characters), K<sup>K</sup> (3 or 4 characters): in fact, these last two sequences have the letter K in common at one end, which does not make it possible to determine their exact length.
- This method gives “CLOQK” as the solution instead of “CLOCK”, which does not necessarily seem insurmountable, especially since this error could recall the one appearing in the solution of the K1 code (“IQLUSION” instead of “ILLUSION”).
- The method also requires an inversion of two letters T and N, in the first Vigenère code (“ENCHATNING” instead of “ENCHANTING”). This point could be seen as a weakness of the proposed solution, but I do not have the impression that it is, in itself, a sufficient reason to definitively rule it out.

## IV. Beginning of the K4 Code and D<sup>Y</sup> A H<sup>R</sup> anomaly

The application of this method leads to very interesting results for the beginning of the K4 code, especially concerning the first seven letters by using the geometric sequence D<sup>Y</sup>.

|               |   |   |   |                |   |   |   |
|---------------|---|---|---|----------------|---|---|---|
|               | 0 | 1 | 2 | 3              | 4 | 5 | 6 |
| CODE K4       | O | B | K | R              | U | O | X |
| 1st LAYER KEY | C | L | E | A              | R | C | U |
| 2nd LAYER KEY | D | F | H | J              | M | Q | V |
|               |   |   |   | D <sup>Y</sup> |   |   |   |
| SOLUTION      | F | O | R | T              | Y | Y | A |

This result leads to believe that **the solution to the K4 code would start with “FORTY YARDS”**. It appears interesting for at least two reasons:

- This would be consistent with the expected content of the solution, which is supposed to indicate a precise location, in connection with the 1<sup>st</sup> clue pointing to the direction “EAST NORTHEAST”.
- The D<sup>Y</sup> sequence establishes a direct link with the D<sup>Y</sup> A H<sup>R</sup> anomaly, which many people believe must play a role in the decryption of the K4 code.

Unfortunately, this method does not produce results beyond the first seven letters, and I propose two alternative solutions below to achieve a consistent message for the first line of the K4 code.

## a) Solution n°1: Operating a rearrangement of the first layer key

The idea is that the key of the 1<sup>st</sup> layer "Clear cut against the dark blue sky, Luna's upper edge appeared ..." can be rearranged by sequence of several letters.

By proceeding in this way, we can find the following solution: "FORTY YARDS RUD. HOUR[H]AND EAST NORTHEAST".

|               | 0              | 1 | 2 | 3 | 4 | 5 | 6 | 7              | 8 | 9 | 10 | 11 | 12 | 13 | 14             | 15 | 16 | 17 | 18 | 19 | 20 | 21 | 22 | 23             | 24 | 25 | 26 | 27 | 28 | 29 | 30 | 31 | 32 | 33 |
|---------------|----------------|---|---|---|---|---|---|----------------|---|---|----|----|----|----|----------------|----|----|----|----|----|----|----|----|----------------|----|----|----|----|----|----|----|----|----|----|
| CODE K4       | O              | B | K | R | U | O | X | O              | G | H | U  | L  | B  | S  | O              | L  | I  | F  | B  | B  | W  | F  | L  | R              | V  | Q  | Q  | P  | R  | N  | G  | K  | S  | S  |
| 1st LAYER KEY | C              | L | E | A | R | C | U | R              | M | I | N  | G  | A  | G  | A              | I  | N  | S  | T  | H  | ?  | ?  | L  | U              | E  | S  | K  | Y  | L  | U  | N  | A  | S  |    |
| 2nd LAYER KEY | D              | F | H | J | M | Q | V | P              | E | N | R  | C  | L  | O  | N              | A  | U  | C  | W  | E  | Z  | ?  | ?  | T              | W  | J  | C  | Y  | U  | H  | A  | K  | N  | V  |
|               | D <sup>Y</sup> |   |   |   |   |   |   | A <sup>B</sup> |   |   |    |    |    |    | O <sup>H</sup> |    |    |    |    |    |    | ?  |    | T <sup>N</sup> |    |    |    |    |    |    | V  |    |    |    |
| SOLUTION      | F              | O | R | T | Y | Y | A | R              | D | S | R  | U  | D  | H  | O              | U  | R  | W  | A  | N  | D  | E  | A  | S              | T  | N  | O  | R  | T  | H  | E  | A  | S  | T  |

### Pros

- It gives a consistent solution linked to the indication of a specific location.
- It reveals the sequence O<sup>H</sup>, which immediately follows the anomaly D<sup>Y</sup> A<sup>B</sup> H<sup>R</sup> anomaly in the K3 code, reinforcing the idea that this specific sequence contains information to create the geometric stream of letters used for coding.
- Finally, note that the sequences A<sup>B</sup> and O<sup>H</sup> give the same result for character n°13 (solution "H"), which would allow the start of the code to be divided into three sequences of 7 letters. On the other hand, we would lose the O<sup>H</sup> sequence which would become N<sup>H</sup> :

|               | 0              | 1 | 2 | 3 | 4 | 5 | 6 | 7              | 8 | 9 | 10 | 11 | 12 | 13 | 14             | 15 | 16 | 17 | 18 | 19 | 20 | 21 | 22 | 23             | 24 | 25 | 26 | 27 | 28 | 29 | 30 | 31 | 32 | 33 |
|---------------|----------------|---|---|---|---|---|---|----------------|---|---|----|----|----|----|----------------|----|----|----|----|----|----|----|----|----------------|----|----|----|----|----|----|----|----|----|----|
| CODE K4       | O              | B | K | R | U | O | X | O              | G | H | U  | L  | B  | S  | O              | L  | I  | F  | B  | B  | W  | F  | L  | R              | V  | Q  | Q  | P  | R  | N  | G  | K  | S  | S  |
| 1st LAYER KEY | C              | L | E | A | R | C | U | R              | M | I | N  | G  | A  | N  | A              | I  | N  | S  | T  | H  | ?  | ?  | L  | U              | E  | S  | K  | Y  | L  | U  | N  | A  | S  |    |

| SOLUTION      | F              | O | R | T | Y | Y | A | R              | D | S | R  | U  | D  | H  | O              | U  | R  | W  | A  | N  | D  | E  | A  | S              | T  | N  | O  | R  | T  | H  | E  | A  | S  | T  |

### Cons

- The solution has a mistake in the term "HOURWAND" (instead of "HOURHAND"), unless it should be read "HOUR W AND", the solution obviously having something to do with clocks.
- The A<sup>B</sup> sequence used for characters 7-12 does not appear anywhere on the sculpture, with the obvious exception of the two panels coding the KRYPTOS alphabet.
- The rearrangement of the key of the first layer appears, at this stage, arbitrary (positioning and length of the sequences) and I have not found a logical method allowing to reproduce such a result.

## b) Solution n°2: Inclusion of a hidden K5 code in the K4 code solution

The existence of a K5 code is a serious hypothesis to take into account. In particular, the creators of the sculpture stated that such a code could not be solved without previously decoding the K4 code.

A possible hypothesis is that this code is directly embedded in the K4 code, which can lead to the appearance of sequences that do not seem to have any meaning in the K4 solution. I propose such a solution below using the full D<sup>Y</sup> A<sup>B</sup> H<sup>R</sup> anomaly:

|               | 0              | 1 | 2 | 3 | 4 | 5 | 6 | 7              | 8 | 9 | 10 | 11 | 12 | 13 | 14             | 15 | 16 | 17 | 18 | 19 | 20 | 21             | 22 | 23             | 24 | 25 | 26 | 27 | 28 | 29 | 30             | 31 | 32 | 33 |
|---------------|----------------|---|---|---|---|---|---|----------------|---|---|----|----|----|----|----------------|----|----|----|----|----|----|----------------|----|----------------|----|----|----|----|----|----|----------------|----|----|----|
| CODE K4       | O              | B | K | R | U | O | X | O              | G | H | U  | L  | B  | S  | O              | L  | I  | F  | B  | B  | W  | F              | L  | R              | V  | Q  | Q  | P  | R  | N  | G              | K  | S  | S  |
| 1st LAYER KEY | C              | L | E | A | R | C | U | T              | A | G | A  | I  | N  | S  | T              | H  | E  | D  | A  | R  | K  | B              | L  | U              | E  | S  | K  | Y  | L  | U  | N              | A  | S  |    |

|               | D <sup>Y</sup> |   |   |   |   |   |   | P <sup>Y</sup> |   |   |    |    |    |    | H <sup>R</sup> |    |    |    |    |    |    | R <sup>R</sup> |    | T <sup>N</sup> |    |    |    |    |    |    | V <sup>?</sup> |    |    |    |
|               |                |   |   |   |   |   |   | +A             |   |   |    |    |    |    |                |    |    |    |    |    |    |                |    |                |    |    |    |    |    |    |                |    |    |    |
| SOLUTION      | F              | O | R | T | Y | Y | A | X              | R | Q | O  | L  | Y  | E  | G              | X  | E  | D  | S  | B  | Y  | E              | A  | S              | T  | N  | O  | R  | T  | H  | E              | A  | X  | S  |

Then the solution would be : « FORTY YA[E]DS BY EAST NORTHEAST” with an inserted sequence framed by two Xs “XRQOLYEGX” and which could correspond to a new K5 code.

#### Pros

- It allows full use of the  $D^Y \text{ }^A H^R$  anomaly, which should be understood like this: the pairs of letters  $D^Y$  and  $H^R$  correspond each to a sequence of 2x7 letters and the isolated letter  $^A$  introduces a jump between the seventh and eighth letters.
- The sequence which does not correspond to anything “XRQOLYEGX” is framed by two X's, and could be seen as isolated from the rest of the solution. It should also be noted that the character X is also used as a separator in the solution to the K2 code.

#### Cons

- Postulating the existence of a meaningless sequence within the solution of the K4 code could be a too easy solution, even if the framing of this sequence by the two X's could moderate this assumption.
- The last sequence of 7 letters is interrupted after 2 characters, which would suggest that K4 is coded on the basis of a 23-characters lines. Note that this 23<sup>rd</sup> position could be linked to the position of the spelling error in the K2 solution ("UNDERGRUUND" instead of "UNDERGROUND"), about which Jim Sanborn declared it has some importance.

### c) The $D^Y \text{ }^A H^R$ anomaly

The anomaly in the upper left corner of the second panel of the sculpture, causing certain letters to appear offset comparing to the rest of the text, has been noticed for a long time and is necessarily important.

|   |   |   |   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|---|---|---|
| E | N | D | Y | A | H | R | O | H | N |
| C | H | T | N | R | E | Y | U | L | D |
| T | P | R | N | G | A | T | I | H | N |
| W | M | T | W | N | D | I | T | E | E |
| T | F | O | L | S | E | D | T | I | W |

The method proposed here would make it possible to give an explanation to this anomaly, using several pairs of letters used in this part of the sculpture:

- $D^Y$  for the “FORTY YA[...]” part (position 0 to 6).
- $O^H$  for the “HOUR[W]AND” part (position 13 to 20) in the solution n°1 above.
- Complete  $D^Y \text{ }^A H^R$  sequence for “FORTY YA[...]RDS BY” (position 0 to 22) in the solution n°2 above.
- $T^N$  for the “STNORTHEAS” part (position 23 to 32).

The meaning of the isolated  $^A$ , in the  $D^Y \text{ }^A H^R$  anomaly, remains obscure in this approach.

The solution n°2 propose an interpretation but several solutions are still possible, without claiming to exhaust the range of possibilities:

- It could correspond to the length of the sequence  $D^Y$  (A being the 8<sup>th</sup> letter of the KRYPTOS alphabet and the  $D^Y$  sequence having 7 characters).
- It could be the abscissa to be used for the start of the sequence, its length being predicted or coded elsewhere.
- If we admit the possibility of rearranging the key of the 1<sup>st</sup> layer, it could also refer to the abscissa to be taken into account for this first coding step.
- Finally, it could refer to the following sequence to use, located elsewhere in the rest of the sculpture.

#### d) Where is the location indicated by the K4 code ?

The solution to the K4 code would point to a location 40 yards in the East-North-East direction. There is, however, a well-known difficulty concerning the starting point:

- Either this is the location of the sculpture:  $38^{\circ} 57' 8.1''$  N,  $77^{\circ} 08' 44.8''$  W
- Either this is the location defined in the K2 code solution, which differs slightly by around 55 yards:  $38^{\circ} 57' 6.5''$  N,  $77^{\circ} 08' 44''$  W

The two sites are shown here, leading inside the building,

### V. Some thoughts to solve the rest of the K4 code

In the absence of a clear vision on how the geometric sequences of letters for the second layer are generated, it is difficult, at this stage, to have a complete solution of the K4 code. However, below are some possible solutions which reveal intelligible sequences in English and which could, without certainty, be part of the solution.

#### Position 44-51: "RAID OVER"

|               | 44 | 45 | 46 | 47             | 48 | 49 | 50 | 51             |
|---------------|----|----|----|----------------|----|----|----|----------------|
| CODE K4       | E  | K  | Z  | Z              | W  | A  | T  | J              |
| 1st LAYER KEY | P  | P  | E  | A              | R  | E  | D  | F              |
| 2nd LAYER KEY | A  | J  | Z  | B              | L  | K  | C  | P              |
|               |    |    |    | A <sup>C</sup> |    |    |    | P <sup>?</sup> |
| SOLUTION      | R  | A  | I  | D              | O  | V  | E  | R              |

#### Position 53-73 : "LAYS AS IT'S A BERLIN CLOCK"

|               | 53 | 54 | 55 | 56 | 57             | 58 | 59 | 60 | 61             | 62 | 63             | 64 | 65             | 66 | 67             | 68 | 69 | 70 | 71 | 72 | 73 |
|---------------|----|----|----|----|----------------|----|----|----|----------------|----|----------------|----|----------------|----|----------------|----|----|----|----|----|----|
| CODE K4       | L  | U  | D  | I  | A              | W  | I  | N  | F              | B  | N              | Y  | P              | V  | T              | T  | M  | Z  | F  | P  | K  |
| 1st LAYER KEY | R  | M  | I  | N  | G              | A  | N  | E  | N              | C  | H              | A  | T              | N  | I              | N  | G  | B  | A  | C  | K  |
| 2nd LAYER KEY | Z  | V  | N  | J  | G              | D  | A  | T  | G              | M  | W              | D  | X              | F  | K              | M  | V  | K  | K  | K  | K  |
|               |    |    |    |    | Z <sup>W</sup> |    |    |    | G <sup>O</sup> |    | D <sup>H</sup> |    | M <sup>T</sup> |    | K <sup>K</sup> |    |    |    |    |    |    |
| SOLUTION      | L  | A  | Y  | S  | A              | S  | I  | T  | S              | A  | B              | E  | R              | L  | I              | N  | C  | L  | O  | Q  | K  |

#### Position 91-96 : "HALL UP"

|               | 91 | 92 | 93 | 94             | 95 | 96 |
|---------------|----|----|----|----------------|----|----|
| CODE K4       | U  | E  | K  | C              | A  | R  |
| 1st LAYER KEY | A  | Y  | O  | F              | T  | H  |
| 2nd LAYER KEY | K  | Y  | T  | S              | B  | D  |
|               |    |    |    | K <sup>Y</sup> |    |    |
| SOLUTION      | H  | A  | L  | L              | U  | P  |

Note that this solution may be of interest if we remember that the location indicated at the beginning of code K4 (40 yds direction East NorthEast) seems to be located in one of the halls of the building.

Some curiosities

|               |                |    |    |    |    |    |    |    |    |    |
|---------------|----------------|----|----|----|----|----|----|----|----|----|
|               | 33             | 34 | 35 | 36 | 37 | 38 | 39 | 40 | 41 | 42 |
| CODE K4       | S              | O  | T  | W  | T  | Q  | S  | J  | Q  | S  |
| 1st LAYER KEY | S              | U  | P  | P  | E  | R  | E  | D  | G  | E  |
| 2nd LAYER KEY | V              | N  | J  | G  | D  | A  | T  | R  | X  | U  |
|               | V <sup>W</sup> |    |    |    |    |    |    |    |    |    |
| SOLUTION      | T              | L  | E  | A  | C  | F  | L  | O  | C  | K  |

The meaning of this passage seems quite obscure and is probably not part of the solution, but it seemed interesting to note this possible second occurrence of the word “*CLOCK*” in the solution.

Summary of the different possible solutions identified

These different parts of a possible solution obviously do not form a coherent whole because some (maybe all) are undoubtedly “false positives”. However, it may be interesting to summarize them in a single table in order to have an overview.

| SOLUTION (POSSIBLE FRAGMENTS) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |
