Re: Clue in K2 CT Row 1, end of row: **Q J N C E**. Inferred: Change the J to E to complete the word FIVE in K1 CT and note the result in K1 PT. Notice there are two instances of VJYQT in K1 CT. Change the J in both instances to E. Result in K1:

E M U F P H Z L R F A X Y U S D J K Z L D K R N S H G N F I V **E**  
 Y Q T Q U X Q B Q V Y U V L L T R E V **E** Y Q T M K Y R D M F D

B E T W E E N S U B T L E S H A D I N G A N D T H E A B S E N **T**  
**E O F** L I G H T L I E S T H E N U A N **T E O F** I Q L U S I O N

Notice the big change in the meaning of K1 PT:

BETWEEN SUBTLE SHADING AND THE ABSENT EOF LIGHT LIES THE NUANT  
 EOF IQLUSION. (Note: EOF = End of File)

In the recent past, a participant in the forum stated that he believed that the often-encountered digram **NC** had the meaning of “no C”. Notice the occurrence of **NC** twice in K1 PT (**ABSENCE**, **NUANCE**).

When viewing the temporarily revised K1 message, we find that it talks about **LIGHT** being **ABSENT** at the **END OF FILE**.

Ed Scheidt, in a recent interview, talked about encountering a change in language base. I determined that the language base being referred to is Russian. I discovered this while working on previous matrices that, in the interest of brevity, I will not show here. But, remember there is clue to this in the string **YAR**.

In Sanborn's hand-written notes, one views a seemingly misspelled **PALIMPCEST**. The **C** in this word is either a mistake or it's a clue. It's a clue! The **C** is a Cyrillic **С**. Hence, the word is spelled correctly, but with the first **С** appearing in Cyrillic. Look at **EST**. Remember **Т IS YOUR POSITION?**

Those who have been following me over these years know that I have shown that the letter **С** was indicated by Kryptos to be inserted in the 9th position before the end of K2 CT. This was not the only time Kryptos specified to add **С** to the text. The second time was when it specified to insert the **FLICKERING CANDLE** (an **С** flickering in the hot air looks like a **З**. This turned out to be at the beginning of K4 CT. I show where **С** is also required to be inserted in two other matrices (my file SIDE-BY-SIDE). There are other instances in the string of Kryptos events, where **С** is inserted in various matrices, but I cannot lay all of it out. You have to take my word for it. Suffice it to say that inserting **С** into text at the beginning of strings has been shown to be precedent-setting rule and is to be expected in Kryptos.

So, now back to K1 PT as modified. **BETWEEN SUBTLE SHADING AND THE ABSENT EOF LIGHT LIES THE NUANT EOF IQLUSION**. Looking again at the seemingly growing importance of the digram **NC**, we can now take another guess as to the real consistency of the **Q** in **IQLUSION**. It must be **NC!! INCLUSION**.

We take this one step further by **INCLUDING** an **С** at the beginning of K1 PT , but make it in the Cyrillic form **С**. Now we have:

**CBET** WEEN SUBTLE SHADING AND THE ABSENT EOF LIGHT LIES THE NUANT EOF INCLUSION. **CBET** is Russian for **LIGHT**. So, this string of text now doesn't make sense, but it has satisfied the proposition that **LIGHT** needed to be added at an end. Has it become something else? Is it suggesting something else has to be done? In both cases, surely.
