Though Sanborn did not assign a number to it, he did indicate more than once that the question mark is part of K4, so we need to keep that in mind.

Quickly, we see that BERLIN lines up with BERLIN. We also see other matches. The ones standing out the most are HE in both SPHERES lining up with SSES, the IGs that line up 13th and 12th from the ends and the Os and Ts. The other colored boxes show two or more match-ups. Notice in the Reagan quote: ...DAY WHEN THE SUN... seems to correspond with ...SUNSHINY DAY in the song lyrics. Also (and, without going into the details as to why), SOV (which is a version of SOL), lies over DIA (DAY). Also, THE SUN lies over SOL 14 letters from the beginning. Notice Sanborn's initials merge at position 41.
