This is what we had after step 1.

A first layer of exactly 97 characters.

Put this first layer of 97 aside for now. There's nothing that can be done with that until after the second layer is discovered in step 2.

STEP 2

Use this part now:

T	O	S	B	E	T	W	E	E	N	S	U	B	T	L	E	S	H	A	D	I	N	G	A	N	D	T

Now is the time to error correct the word “desparatly” into “despEratEly”. Put this in a matrix, 26 columns wide, which makes for a perfect matrix now. (The english language has 26 characters. More on that later.)

Isn’t it something that the two omitted characters S and E are the initials of someone. Sort of like a signature that needed to be recovered and inserted somewhere.

Everything that is corrected or added in K1-3 so far are:

L (iLlusion) O (undergrOund) S (X layer two) E (despEratly) E (desperatEly)

Together that is LOSEE, or if read as an instruction: “LOSE E” (remove or replace the character E)

In the morse code pieces there is an incomplete question “What is your position?”

Just read it as it is: “T is your position E” (this T is highlighted in green on the next page, just as a reference)

Highlight all the characters “E” and the corrections so you can keep track of where they are. Whether you correct them or not is not so important now. That will become clear in step 3.

Do a count, but don’t count the green T. That one is just to show the position where to look.

97 again !!!

Note that there are two rows that do not contain an E.
OFSIONITWASTOTALLY... and HOKNOWSTHCTLOCATION...

This kind of split’s it into three sections. a bit like K1 K2 and K3. First a short section K1, then bit longer to end with the longest section K3.

Rotate this 180 degrees and transplant it onto the tableau side.

It will look like this:

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z	A	B	C	D

Why rotate 180? Build your own theory but in step 1 we started with the instructions in K3 so that needs to be first, or on top of the rest.

Highlight the two rows that do not contain E to see that the 180 degree rotation is indeed necessary, correct, and that there is a check for it. Remember the last two characters found in step 1?

Don't worry that there are still E now.

See how it sort of splits into three parts. A very short part like K1, a longer part like K2 and the longest so far: K3.

Now read off the characters in a certain way;
left to right? top to bottom? per part (like K1, K2, K3)? or in still a different way?

The answer is in the introduction of step 3 where combining the two layers of 97 characters can begin.

Do whatever you want but it is too soon to do anything to K4.
As said before, that's for step 5. Patience...

Enjoy.
