

DEKRYPTOS

K4R1

DRAFT

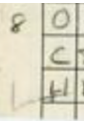

Method: Steganography/ Riddle

Hints:

- Plain Text **UNDERGROUND** is spelled correctly on the charts but not the sculpture.
- “You got to **delve** in that particular clock”. - Jim Sanborn

Text: K2 Plain Text(PT) over K2 Cipher Text(CT)

Storyline: Howard Carter excavating or walking the steps to King Tuts tomb.

	“ed” is lowercase in the 8 th row plain text, possibly to draw attention to the word BURied .
UNDERGR <u>U</u> UND	Insertion point for your first STEGO block.
	Row 8 has an elbow marking with an unknown purpose, possibly decode direction/type.

NOTE: Because we are decoding, we need to modify the charts to reflect CT on top (mask) and PT on bottom (carrier). We are using a width of 42 to fit on the page but you may use any reasonable width you like. The repeated keyword layer has been omitted.

STEGO TYPE - 1

- Locate your starting position(A) within the CT layer.
- Find the next instance of the K4 character (B).
- The decoded letter (C) is that position, but in the (PT)

STEGO TYPE - 2

- Locate your starting position (A) within the mask layer.
- Move over by K4 letter value (B)
- The decoded character (C) is at the position you land on

K 0	O 5	D 10	I 15	Q 20	Z 25
R 1	S 6	E 11	J 16	U 21	
Y 2	A 7	F 12	L 17	V 22	
P 3	B 8	G 13	M 18	W 23	
T 4	C 9	H 14	N 19	X 24	

(KRYPTOS alphabet values).

OBKRUOXOGHULBS				
OLIF	BBWF	L	RVQ	QPRN
GKS	S	OTWT	QSJQ	SSEK
Z	ZWA	TJKL	UDIA	WINF
BNY	P	VTTM	ZFPK	WGDK
Z	XTJ	CDIG	KUHU	AUEK
CAR				

(KRYPTOS incomplete K4 Block Matrix).

Mengenlehre clock

The above block matrix was inspired by the Berlin clock clue where the K4 format loosely mirrors that of an up-side-down Mengenlehre clock.

Some possible hints within K4 include:

- **OLIF** - FILO (First In Last Out)
- **SSEK** - SEEK is the hint for GKSS starting position "Can you see anything Q".
- **WINF** - Believed to represent WIND and/or WIN (as in winning a race)
- **DIG** - The first hint that introduces us to K4.
- **CAR** - Lord Carnarvon, Howard Carter, car (automobile)

STEP 4: Go back to the insertion point “UNDERGRUUND”. Here you will decode in reverse for both the cipher block XTJ and carrier text reading direction. Using the TYPE-1 STEGO method to decode J to D, T decodes to U, X decodes to M.

Diagram illustrating the decoding process for the carrier text "UNDERGRUUND" using the TYPE-1 STEGO method. The carrier text is read in reverse (right to left), and the cipher block is read in reverse (left to right). The resulting decoded text is "UNDERGRUUND".

Legend for the decoding process:

- FOURTH Z/A
- THIRD X/M
- SECOND T/U
- FIRST J/D

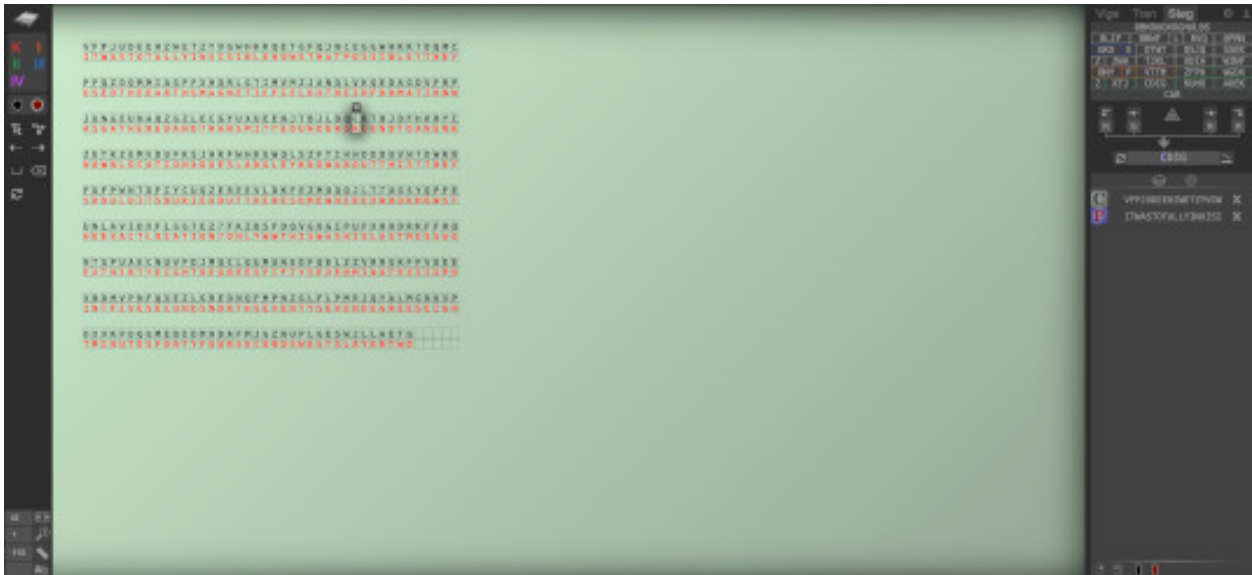

K 0	O 5	D 10	I 15	Q 20	Z 25
R 1	S 6	E 11	J 16	U 21	
Y 2	A 7	F 12	L 17	V 22	
P 3	B 8	G 13	M 18	W 23	
T 4	C 9	H 14	N 19	X 24	

(Letter to index value)

STEP 5: Use the TYPE-2 STEG method by:

- Locate your position at X over M (index 103).
- Move to the left by Z (25).
- The letter you land on is your decoded letter "A".

If you are using DeKryptos.com you can use the following:

Step 1: Press Book Of Knowledge(BOK) in the top left of your window to close the Book Of Knowledge.

Step 2: Press II in the top left to load the K2 CT and PT layers.

Step 3: Press the STEG button in the top right to load the STEG tool.

Step 4: In the STEG field, press “CDIG”to load the block into the STEG tool.

Step 5: Set your cursor Q over G  (Position 114).

Step 6: Press the Type-1 STEGO method on the right side of the STEG tool 4 times.

Step 7: Press the scribe icon to apply your decoded text to the STEG field.

Step 8: Load KUHU by clicking on this block of the STEG Field.

Step 9: Press the Type-1 STEGO method on the right side of the STEG tool more 4 times.

Step 10: Press the scribe icon to apply your decoded message.

Step 11: Load AUEK by clicking on this block of the STEG Field.

Step 12: Press the Type-1 STEGO method on the right side of the STEG tool more 4 times.

Step 13: Press the scribe icon to apply your decoded message.

Step 14: Go back to index 114

B	Q	C	R	T	B	J	D
R	G	R	U	U	N	D	T

Step 15: Click to load XJT from the STEG field.

XJT

Step 16: Reverse the loaded text to produce JTX

Step 17: Press the Type-1 STEGO method on the left-hand-side of the STEG tool 3 times.

Step 18: Reverse the STEG input JTX

Step 19: Press the scribe icon to apply your decoded message.

Step 20: Click to load from the STEG field.

Z

Step 21: Execute a type-2 STEGO method by moving over by STEG value ($Z = 25$) to land on your decoded character.

Step 20: Press the scribe icon to apply your decoded message to the K4 STEG field.
