

Pull it off how to transpose it?

As long as the process is uniform and repeatable anything goes. Neither does the message need to say in standard form anything that you or I would understand.

Ah! the bird has flown. That I had the feathers to join that search for endless summer. To face another winter alone without that sweet clarion call will surely wither my soul.

Is this a stab at poetic lament on love lost or a call for mission completed, help and rescue? But lets transpose it.

There are 131 characters. I will use the keyword gabriel for the first transposition, but neither does the keyword need to be a real word, nor does it need to be properly spelled. I could as easily use sneedles, or eazally. My recipient would know.

G A B R I E L G A B R I E L G A B R I E L G A B R I E L G A
a h t h e b i r d h a s f l o w n t h a t i h a d t h e f e
B R I E L G A B R I E L G A B R I E L G A B R I E L G A B R
a t h e r s t o j o i n t h a t s e a r c h f o r e n d l e
I E L G A B R I E L G A B R I E L G A B R I E L G A B R I E
s s s u m m e r t o f a c e a n o t h e r w i n t e r w i t
L G A B R I E L G A B R I E L G A B R I E L G A B R I E L G
h o u t t h a t c l a r i o n c a l l w i l l s u r e l y w
A B R I E L G A B R I
i t h e r m y s o u l

Now I will pick it out alphabetically for the first transposition

a H D W H E T H C D M A H E U L A S I S
b T H N A A O A H L M C E R T A L U T O
e B F A H E I E R S T N I T A O I L R
g A R O I F S T R N U F T T O C C L W Y
i E S H T H O S O S R A W I H I W E E L
l I L T E R N A E S O O N H T N L Y M
r H A T D T J T F E E E R W T R L R H U

Each A of the repeated gabriel has a clear text letter under it. Those letters form the first row and etc. The next step is to pull this off in some fashion to make it look like a message but also to transpose it again. Once again those that the message is addressed to will know this step. Since I am doing this exercise to explore possible ways that K4 might have been created, looking for a krib, I will follow Sanborn's clues, "EASTNORTHEAST" and "BERLINCLOCK".

One thing I notice. I have the word summer in the message and because they are transposed by the ab in the keyword the double m in summer is stacked at the top center.

I do my work on a PC mainly because I cannot read my own writing and I like the clarity of the table grid when looking for patterns. I am going to copy that first transposition table down here.

a	H	D	W	H	E	T	H	C	D	M	A	H	E	U	L	A	S	I	S
b	T	H	N	A	A	O	A	H	L	M	C	E	R	T	A	L	U	T	O
e	B	F	A	H	E	I	E	R	S	T	N	I	T	A	O	I	L	R	
g	A	R	O	I	F	S	T	R	N	U	F	T	T	O	C	C	L	W	Y
i	E	S	H	T	H	O	S	O	S	R	A	W	I	H	I	W	E	E	L
l	I	L	T	E	R	N	A	E	S	O	O	N	H	T	N	L	Y	M	
r	H	A	T	D	T	J	T	F	E	E	E	R	W	T	R	L	R	H	U

131 letters and 131 is a prime. I have 2 short lines so it is easy to add a null and make the count 132 and that will let me make a table 12 cells wide by 11 cells high. If I start the second transposition like a berlin clock the first letter off will be the H in the lower left corner and the last letter will be the S in the upper right corner. East North East of the starting H.

H	I	E	A	B	T	H	A	L	S	R	F
H	D	T	T	H	O	A	N	W	D	E	T
I	H	A	H	T	R	H	F	E	A	E	J
N	O	S	I	O	T	T	A	S	T	E	A
H	F	E	O	R	R	H	C	E	S	S	N
S	L	D	E	O	R	U	T	M	M	E	O
A	F	N	C	A	R	N	W	T	I	E	H
W	H	I	T	T	R	E	T	T	H	O	A
T	U	R	N	I	C	O	A	L	L	L	W
C	I	L	A	R	Y	E	L	L	U	S	H
M	E	W	R	T	I	U	L	Y	O	S	N

So I took it off by column and laid it in by row. The final N being the null, I made that letter red to remind myself. Now to build the message I will transmit I will use the same technique. Starting bottom left with the M and ending top right with the F. Maybe as a key for my receiver I will build the message in 7 letter groups. I could use any length but the 7 will be a hint to our code word.

MCTWASH NIHHEIU HFLFOHD IWL RIND ESATERA NTCEOIH TATRITA OROTHBI
YCRRRRT ROTUEOE NUHTHAH LLATWTC AFNAYLL TTMESEW LOULHIM STADSSS
LOEESEE R^NHWAHO NAJTF

SO! To get here I chose the keyword GABRIEL and used the alphabetic numeric sequence of the letters to make my first transposition. I then used my interpretation of the Sanborn clues to pull the letters off in columns and create a new grouping in a fairly equal grid, (12 x 11). Finally I pulled those off using the same technique in groups of 7 to create the encrypted message. Having nothing but the message and our shared notes how would I as the receiver unwind that?

The seven letter grouping tells me to use the 7 letter keyword from our list
Count the letters and create a grid using the factors of that number, (there are six sets of factors that will multiply out to 132 so you have 5 chances to be wrong.)
Populate the grid, the last letter of the message goes in the top right corner
Make a grid of 7 rows
Populate this new 7 row grid starting at the bottom left using the top line read left to right
Use the keyword to lay the letters back into position
