

M6 Expanding the Matrix System

When in the M2 message we recovered the Original Matrix or plaintext matrix, which from now on we will name the P matrix, we find BERLIN and two MERGE as important clues, in addition to other curious clues such as SUPERMEN and TIE A FLEA, ELY, OIE, LAW and two crossed HINTs. When in the M3 message we recovered the second matrix of the system or the ciphertext matrix, which from now on we will name the C matrix, we saw as important clues OHNNY NASH, I SEE, LINE BLUE, TEE between STONE and HARD SITE, two QUEENS with mistakes and MATE.

The instructions or clues on how to build the new matrices, that Kryptos gives us, are many. The most obvious is the duplicate MERGE instruction, horizontally and diagonally. MERGE is the doorway that will lead us to new discoveries. Also Jim in his chart #1 shows us alternating P and C vertically. One of the many interpretations of K1 can be: BETWEEN SUBTLE SHADING (some light, plaintext) AND THE ABSCENCE OF LIGHT (no light, ciphertext). Finally, which game has 2 QUEENS and MATE? Of course: CHESS with checkMATE. Once again Kryptos tells us how to continue on our trail of doorways.

We will make two other matrices, as in a chessboard, merging the matrices P and C. In the white squares (light) the plaintext and in the black squares (no light) the ciphertext. We will name the matrix that has in column 1 row 1 plaintext, the P/C matrix. We will name the matrix that has in column 1 row 1 ciphertext, the C/P matrix. It is as if we had made it on a chessboard turned 90°. To facilitate reading and to be able to highlight the findings, I have left all the squares white, the plaintext in blue and the ciphertext in black. The P/C matrix is as follows:

P / C	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

Many new words in correct English appear in the rows and columns of the P/C matrix. The diagonals are the same as in matrices P and C. I am going to comment on some that I consider important, but surely I have overlooked other valuable clues that you can find, in this and the other matrices. The longest is THE GOD MAID. It refers to a character from the book *The Flute of the Gods* (a novel about the Navajo people in times of Spanish rule) by Marah Ellis Ryan. Will she be the prominent fiction writer Jim refers to in his letter to CIA employees? Then he said that he is the author of all the plaintext. How many times have Jim and Ed mentioned the Navajos or their language? Is it the Navajo language that Ed considered using in Kryptos and then they agreed to make it English? The Petrified Tree Jim brought it from Arizona, a state where most of the Navajo reservation is located. How many coincidences! I recommend taking a look at chapter XXII "AT THE TRAIL'S END". There is a DOORWAY as in K3. And phrases like "Your trail is to the hills", "Where the bluebird builds her nest", "I build the nest for you, and sing the bluebird song for you at the trail's end." TRAIL, END, HILL, BLUE song, NEST. There is a nest-shaped NEST in the P/C matrix. AIR and HOT also appear as in K3, and TEAR. Finally, the mistake in DESPARATLY, the A in column 11 row 1 of SK is what causes the appearance of the first A in NASA SEAL. We have found a logical explanation for the third intentional mistake! The NASA insignia is known as the meatball. The NASA seal is as follows:

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION USA, 44 characters candidates for a pseudo OTP? We will see that SPACE US appears later as possible plaintext for K4. In the next column, next to SEAL we can read ALFA, it is the international phonetic code for the letter A.

Before moving on to the C/P matrix, we are going to comment on a finding made by member Matt. His last posts were #9728 and #9729 in January 2010 (it seems like every time a member finds something important related to Kryptos... this was his last message, just like WW). Matt uploaded the file "AmlCrazy.xls" to his personal folder (Mattylw's folder). Matt drew on previous work from Dan Ankuda. Dan arranged the plaintext K1, K2, and K3 in 21 columns and then rotated it 90° clockwise. The matrix reads THE BALL (Reference to the NASA insignia?). In his work Matt modifies Dan's matrix and finds that by doing fixed jumps, the following texts are hidden: jump 29 YOU DID IT, jump 31 SECRET, jump 36 TESTING, jump 33 ONE and jump 16 DOOR. This doesn't just seem random, this is intentional, especially the first 3. In the M4 message we discussed how SECR appeared after a possible QUEEN. Then something will have to be DONE and something will have to TEST. The C/P matrix is as follows:

C/P	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

In the center of the C/P matrix appears BRIGHT misspelled (reminiscent of the Johnny Nash song) in a cluster with ELY and OIE (again the keys of BERLIN). And in column 31 we can read a new instruction: DO IT! (Let's remember the YOU DID IT from Matt's matrix). The O is for XLAYERTWO, which confirms that in the matrix system, we must add the S in the ciphertext so that XLAYERTWO appears in the plaintext. But what do we have to do? In the same column, after DO IT is EBRSID, the debris of DEBRIS! DEBRIS appears in K3. And in NK in the same column 31 is EIZNHT, the debris of ZENITH! Two anagrams. We will reorder the 6 rows of NK 5, 3, 6, 4, 8 and 7 (the order of ZENITH) and the 6 rows of SK 8, 3, 4, 5, 7 and 6 (the order of DEBRIS). Let's not expect to see ZENITH and DEBRIS, as there are plaintext and ciphers that switch between each other and between the P/C and C/P matrices. The new P matrix, having passed through the ZENITH and DEBRIS doorways, is the following:

P	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

In the new P matrix we see that FLAT, TEAM, TILTS, OIE, LOSE NAST, THE GATE (would that be a reference to THE golden GATE, a confirmation that SAN FRANCISCO is a correct piece of K4 plaintext?) and LION appear. And if we aggregate K1 after K4 (following the ANTIPODES instruction as we did in the M1 message) TANGO appears, which is the International phonetic code for the letter T. OTEL also appears, which we will comment on in the corresponding C/P matrix. The new C matrix is as follows:

C	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

In the new C matrix we see that BAND appear, two crossed TEENS and STAR (a BAND of TEEN STARS?), SEE TEST (do we see the first TEST that we are on the right path? Let's remember TESTING of the Matt's matrix), APES, THREE (and a cluster of 3 other E pairs), FUMED and USA. The new P/C matrix is as follows:

P / C	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

In the new P/C matrix we see LENS, DENT, NOOK and what I think is the great doorway linked to K5: THE PENNY RED UK. There are two PENNY RED, a USA coin and a UK postage stamp:

In the new C matrix we have USA, and here, on the same diagonal as RED, we have UK. Also in the new P matrix we have a LION, one of the symbols of the United Kingdom. Taking into account all this, and from the clues and evidence that appear later, I think that the final doorway is the postage stamp, successor to the PENNY BLACK, the world's first postage stamp. In it we can see POSTAGE at the top. The image of QUEEN VICTORIA in the center. ONE PENNY at the bottom. The letters in the corners identify the column and row of the stamp location on the printed sheet. In the NW and SE corners the column appears, which varies from A to L (12 columns). In the NE and SW corners the row appears, which varies from A to T (20 rows). The

example stamp occupied column 1 and row 2 on the printed sheet. In the first impressions of THE PENNY RED, there were no letters in the upper corners but two stars. We have STAR in the new C matrix. Each row was worth 1 shilling and the entire sheet 1 sterling pound. As we assumed, a QUEEN is linked to Kryptos, none other than the “Grandmother of Europe”. One possibility is that RQ in K0 (Red Queen) and CAN YOU SEE ANYTHING Q? in K3, they refer to Queen Victoria. In this case on the edges, between the height of the eyes and the mouth, is the number of the printing plate. In the example we can see 77, one of the rarest plates and therefore one of the most valuable. Finally, the new C/P matrix is the following:

C/P	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

In the new C/P matrix we see that SET HANDS appears (the first reference we find to a CLOCK!). Finally, three very particular words appear again, with the pattern of being seen here without their first letter. ELTA in column 3, OTEL and ANGO that we already saw in the new P matrix. DELTA and HOTEL, like ALFA and TANGO, make up the select group of 26 words, unique in the world, of the international phonetic code, in which DELTA is D and HOTEL is H. They are three words of the phonetic code with 5 letters. Furthermore, the symmetry between OTEL and ANGO is perfect, forming an arrowhead. Will this be a clue to test in the TFI algorithm: D, H and T BY ROWS? I have not built those tables yet. It is truly amazing how new instructions and clues from Kryptos continue to emerge; and that does not end in this message.

In the next M7 we will delve into the subject of DELTA and HOTEL and how they lead us to a unique and special place in Africa, following a logical reasoning, with a new interpretation of the DYHR cluster. As we have seen, the vast majority of the instructions, clues and doorways

are found in correct English or fulfilling recognizable patterns, and some lead us to the other. Is it another test that we are on the right trail? And there is still more!

Jose Luis
